Response Number 1006

Q.1 What are your views on the proposal to introduce real-time reporting for B2B and B2G transactions?

As usual everything that is happening is pushing more work & responsibility on the employer in time and cost. Government, Ireland, Banks push more and more on the user and then charge more for their services - joke

Q.2 What matters should be considered in planning for a transition to a new VAT Reporting system?

Pile as much pressure, cost and time on the companies so Revenue can have more tea breaks and increase their annual holidays entitlement. I still get 20days a year and cant afford to even take them because of so much time pressure to get jobs done

Q.3 If your business is currently subject to a VAT reporting programme in another EU or non-EU country, can you please share best practice, recommendations or lessons learnt?

a

Q.4 Have you any observations, concerns or recommendations on a move to mandatory electronic invoicing for B2B & B2G domestic VAT transactions?

Yes

Q.5 Revenue is particularly interested in hearing views from businesses that are already engaged in eInvoicing Public Bodies within Ireland or engaged in B2B eInvoicing throughout Europe and beyond. How did you prepare and what challenges prevailed in your preparations for eInvoicing?

a

Q.6 What suggestions would you offer in Ireland's arrangements for a mandatory B2B and B2G eInvoicing programme?

Joke

Q.7 Revenue are cognisant that small businesses may have different perspectives and requirements to large businesses, so what information prompts would you find useful for businesses in completing the VAT return?

Leave it alone
