Subject: [External] VAT Consultation

Thanks for opportunity to provide input- I am helping my husband for past years on claiming his Unregistered VAT refunds as farming – we are small holders and find the process really complex If there were so practical ways to improve the filing of claims for returns on unregistered VAT it would be very beneficial – we are happy to provide specific suggestions or ideas if there is a forum to do so – particularly if something could be organised for farmers in particular to consult?
Thank you
