Response Number 995

Q.1 What are your views on the proposal to introduce real-time reporting for B2B and B2G transactions?

This is just making things even more difficult for small business. I'm trying to run a business and I put aside time each month for Revenue obligations. I don't have time or the technical skills for doing this stuff on the hoof or on an app.

Q.2 What matters should be considered in planning for a transition to a new VAT Reporting system?

That its user-friendly. and by that I mean friendly for the tax payer to use

Q.3 If your business is currently subject to a VAT reporting programme in another EU or non-EU country, can you please share best practice, recommendations or lessons learnt?

n.a

Q.4 Have you any observations, concerns or recommendations on a move to mandatory electronic invoicing for B2B & B2G domestic VAT transactions?

its a terrible idea. I don't know what B2B or B2G or eInvoicing is. I'm focused on keeping my company in work and in paying my staff, revenue and suppliers.

Q.5 Revenue is particularly interested in hearing views from businesses that are already engaged in eInvoicing Public Bodies within Ireland or engaged in B2B eInvoicing throughout Europe and beyond. How did you prepare and what challenges prevailed in your preparations for eInvoicing?

no idea of what this question even means

Q.6 What suggestions would you offer in Ireland’s arrangements for a mandatory B2B and B2G eInvoicing programme?

don't forget the user - if i have to learn more of this stuff I'm just going to retire

Q.7 Revenue are cognisant that small businesses may have different perspectives and requirements to large businesses, so what information prompts would you find useful for businesses in completing the VAT return?

its ok - it works as is
