

**Automated Import
System (AIS)**

**LoLo Entry
Scenarios**

AIS

Supply Chain Communication

AIS allows Revenue to fully implement the provisions allowed for under the UCC (Union Customs Code)

Each declaration lodged should accurately reference the previous declaration lodged in respect of the goods. In general, you do this by referencing the MRN (**Master Reference Number**) of the previous document

The previous document field, data element (D/E 2/1) is a mandatory field that must be completed on all declarations. Failure to accurately complete this field could disrupt the movement flow

Goods Presented at Designated Customs Office within Port. Ireland is office of 1st Entry into EU. Customs Declaration is Lodged Post Presentation

Carrier responsible for lodging ENS (safety & security declaration) into ICS (Import Control System)

Notification of arrival (DTTAS)

Carrier will provide presentation notification (G3)

Carrier will provide Temporary Storage Declaration (G4)

Importer/Agent/
Freight Forwarder will lodge Customs Import Declaration

- Carrier will lodge a combined G3/G4 into AIS. Declaration should reference the MRN of the ENS in data element field (D/E) 2/1 (previous document field)
- Details of the combined declaration will be given to the Temporary Storage Facility (TSF) Operator
- Supply chain communication - Importer/Agent/Freight Forwarder **must** reference MRN & item number (where applicable) of the G3/G4 on the Customs Import Declaration in D/E 2/1

What Revenue Expects

Goods Presented at Designated Customs Office within Port. Ireland is office of 1st Entry into EU. Customs Declaration is Pre-logged

Carrier responsible for lodging ENS into ICS (Import Control System)

Importer/Agent/
Freight Forwarder will lodge Customs Import Declaration

Notification of arrival (DTTAS)

Carrier will provide presentation notification (G3)

Carrier will provide Temporary Storage Declaration (G4)

What Revenue Expects

- Carrier will lodge a combined G3/G4 in AIS, which should reference the MRN/item number of the pre-logged declaration in data element D/E 2/1 (previous document field). The carrier can also reference the MRN of the ENS in D/E 2/1
- Details of the combined declaration will be given to the TSF Operator

The previous document field can reference multiple declaration types i.e. the MRN of the pre-logged H1 and the MRN of the ENS.

Shipments from countries with which the EU has a Safety

Security agreement
