1 Change in rates of Mineral Oil Tax (MOT) from 1 May 2023

From 1 May 2023 changes in Mineral Oil Tax (MOT) rates for certain mineral oils take effect. Changes in rates apply to kerosene, fuel oil, marked gas oil (MGO)/green diesel, liquefied petroleum gas (LPG), and vehicle gas. The MOT rate for substitute fuel used other than as a propellant also changes from that date. Table 1.1 lists MOT rates effective from 1 May 2023 for all fuel descriptions and uses.

Changes in MOT rates for certain mineral oils effective from 12 October 2022 are provided in Table 1.2. From that date MOT rates increased on petrol, auto-diesel, aviation gasoline, heavy oil used for air navigation and private pleasure navigation, and substitute fuels used as a propellant.

MOT rates in place prior to 12 October 2022 are available in Appendix XI of the [Accounting for Mineral Oil Tax TDM](#).

1.1 Rates of Mineral Oil Tax with effect from 1 May 2023

From 1 May 2023 the basis on which the MOT carbon component for certain mineral oils and vehicle gas is calculated changes from charging €41 per tonne of CO₂ emitted to €48.50. Changes to the MOT carbon component and overall rates effective on 1 May 2023 are denoted by *, all other rates remain unchanged. The overall rate of MOT on vehicle gas at GCV does not change as the increase in the MOT carbon component is compensated fully by a decrease in the non-carbon component. From 1 May 2023 the NCV to GCV rate conversion factor for vehicle gas is 0.9017.

From 1 May 2023 the basis for calculating Solid Fuel Carbon Tax (SFCT) changes from charging €41 to €48.50 per tonne of CO₂. This results in increases in the rates of SFCT on all solid fuels. The new rates of SFCT for the various solid fuel categories are set out in the table below along with the SFCT rates in place from 1 May 2022 to 30 April 2023. SFCT rates prior to 1 May 2022 are available in Appendix I of the [SFCT Compliance Procedures Manual](#).

3 Rate of Natural Gas Carbon Tax (NGCT) with effect from 1 May 2023

From 1 May 2023 the basis for calculating Natural Gas Carbon Tax (NGCT) changes from charging €41 to €48.50 per tonne of CO₂, resulting in an increase in the NGCT rate applicable to supplies of natural gas for non-propellant purposes. The new NGCT rate, expressed at both gross calorific value (GCV) and net calorific value (NCV) is given below along with the NGCT rate in place from 1 May 2022 to 30 April 2023. The NCV to GCV rate conversion factor is 0.9017. NGCT rates prior to 1 May 2022 are available in Appendix I of the [NGCT Compliance Procedures Manual](#).

4 Rate of Electricity Tax with effect from 1 January 2020

Section 44 of Finance Act 2019 provides that from 1 January 2020 the rate of Electricity Tax on electricity supplied for business use increases from €0.50 to €1.00 per unit (megawatt hour). The business and non-business rates of Electricity Tax are now equalised. The rate of Electricity Tax applicable from 1 January 2020 is set out in the table below along with the Electricity Tax rates in place from 1 October 2008 to 31 December 2019.
