#### Introduction

Section 285D of the Taxes Consolidation Act 1997 (TCA 1997) provides for a scheme of accelerated capital allowances (referred to as wear and tear allowances) for capital expenditure incurred on certain farm safety equipment by a person¹ carrying on a trade of farming. The expenditure must be incurred in the period 1 January 2021 to 31 December 2026 and the Minister for Agriculture, Food, and the Marine (the Minister) must certify the expenditure. Once certified, the expenditure can be written off at a rate of 50% per annum over two years rather than at the normal rate of 12.5% per annum over eight years.

The scheme is subject to an overall annual budget of €5 million (excluding VAT). Additionally, there is a limit of €500,000 on the total amount of relief that can be granted to any person under this scheme.

## 1. Capital Allowances

Capital allowances in the form of wear and tear allowances will be available where the provisions of section 284 TCA 1997 are met as follows:

- A person carrying on a trade must incur capital expenditure on the provision of machinery or plant for the purposes of that trade;
- The machinery or plant must belong to that person;
- The machinery or plant must be in use at the end of the chargeable period for which the allowances are claimed;
- While the machinery or plant is used for the purposes of the trade, it must be wholly and exclusively so used.

Wear and tear allowances for machinery or plant are generally given over an eight-year period at an annual rate of 12.5% of the capital expenditure incurred. In the case of farm safety equipment which is certified as qualifying equipment, the rate is accelerated, and the entire allowance can be claimed over a two-year period provided the equipment is in use for the purposes of the person's farming trade at the end of the chargeable period. Equipment that is machinery or plant but has not been certified as qualifying equipment can avail of the normal wear and tear allowances.

3

<sup>&</sup>lt;sup>1</sup> A company or an individual whether carrying on the trade as a sole trader or in partnership.

The normal rules regarding balancing charges in section 288 TCA 1997 apply. Where certain 'balancing' events occur, for example, the sale of the equipment or its ceasing to be used for the purposes of the trade, there may be a clawback of the allowances already granted having regard to the proceeds or value of the equipment (or deemed proceeds/value) at the time of the event.

## 2. Who can qualify for the incentive?

The scheme of accelerated capital allowances is available to companies and unincorporated businesses that incur expenditure on eligible farm safety equipment for use in their farming trade. The equipment must be owned by the business.

## Qualifying Equipment

To qualify for the accelerated wear and tear allowances, the equipment must be of a type specified in the table in Part 2 of Schedule 35 TCA 1997. A copy of the table is reproduced at Appendix 1.

## Qualifying Certificate

A claimant under this scheme must have received a "qualifying certificate" (certificate) from the Minister stating that the equipment concerned is qualifying equipment. An application can be made to the Minister for a certificate once the equipment has been acquired. Where, on receipt of an application, the Minister is satisfied that the equipment is qualifying equipment (and that the annual budget for the scheme has not been exceeded) the Minister will issue the required certificate. Information contained in the certificate will include a description of each item of qualifying equipment and the related qualifying expenditure, a unique identification number and the name, address and "tax reference number" (TRN) of the claimant. The certificate may include other information that the Minister considers necessary.

By 28 February each year the Minister will provide Revenue with details of all qualifying certificates issued in the previous year, together with the information referred to above. Details will also be provided of any certificates that were cancelled for a year (please refer to section 10 for information on the circumstances where a qualifying certificate that has already been issued may be subsequently cancelled).

## 4.1 Application for a qualifying certificate

To apply for a certificate, the applicant must use the <u>application form</u> provided by the Department of Agriculture, Food and the Marine (DAFM). Among the details required on the form are the applicant's name, address, TRN and a description of the equipment and its cost together with other information the Minister considers necessary.

## 5. Qualifying expenditure

Qualifying expenditure is the amount which the Minister considers to be a reasonable purchase price for the qualifying equipment.

## 6. Who can avail of the scheme?

Any person carrying on a trade of farming who incurs capital expenditure on qualifying equipment between 1 January 2021 and 31 December 2026, and who has received a qualifying certificate from the Minister in respect of that equipment, can claim the accelerated capital allowances. Farming for these purposes is given the same meaning as in Part 23 TCA 1997 and means farming farmland, that is, land in the State wholly or mainly occupied for the purposes of husbandry, other than market garden land. A person who leases out their land cannot claim accelerated allowances under the scheme.

Certain entities are specifically excluded from claiming accelerated capital allowances under the scheme. These are:

- a person who is an undertaking<sup>2</sup> in difficulty<sup>3</sup>,
- a person who is part of an undertaking part of which is subject to an outstanding recovery order following a previous decision of the Commission of the European Union that declared an aid illegal and incompatible with the internal market, and
- a person who is part of an undertaking that is not an SME<sup>4</sup>.

### 7. How relief is claimed

Once all the conditions of the scheme have been met, a claim for the accelerated allowances can be made through the person's Income Tax Return (Form 11) or Corporation Tax Return (Form CT1) as appropriate. Separate fields are available on both forms for claims under section 285D TCA 1997. Details in relation to the unique identification number assigned to the qualifying certificate must be provided together with such other information as is necessary for the administration of the scheme.

<sup>&</sup>lt;sup>2</sup> Undertaking means the relevant economic unit that would be regarded as an undertaking for the purposes of the Rescuing and Restructuring Guidelines. Rescuing and Restructuring Guidelines means the Communication of the Commission on Guidelines on State aid for rescuing and restructuring non-financial undertakings in difficulty (OJ No. C249, 31.7.2014, p.1).

<sup>&</sup>lt;sup>3</sup> Undertaking in difficulty is to be construed in accordance with section 2.2 of the Rescuing and Restructuring Guidelines.

<sup>&</sup>lt;sup>4</sup> SME has the same meaning as it has in Commission Regulation (EU) 2022/2472 of 14 December 2022 (OJ No. L327, 21.12.2022, p. 1).

### 8. Grants

While every effort has been made to ensure that any equipment that may already be subsidised has been excluded from the definition of "qualifying equipment", section 317 TCA 1997 would, in any event, apply to expenditure incurred under this section so that any grants received would be deducted from the qualifying expenditure.

## 9. VAT

Some farmers may not be registered for VAT and therefore would not be entitled to make a claim for repayment of VAT on expenditure incurred on equipment used for the purposes of their farming trade. Where this is the case, under general capital allowances rules (section 319 TCA 1997), that person would be entitled to include the VAT paid as part of the capital expenditure incurred on the equipment. However, for the purposes of this scheme it is only the VAT exclusive expenditure which will be certified by the Minister. The accelerated capital allowances available under this scheme can only be claimed on the expenditure as certified by the Minister (i.e. qualifying expenditure). Any farmer who is not entitled to claim VAT back on the purchase of qualifying equipment may claim the standard wear and tear allowances at a rate of 12.5% over 8 years on this element of the expenditure.

## 10. Annual budget

An overall annual budget for this scheme of €5 million (excluding VAT) applies. This means that under the scheme, in any one year, where the Minister receives applications, the aggregate total qualifying expenditure of which is in excess of the €5 million annual budget, the Minister cannot issue a qualifying certificate in relation to the expenditure (or part of the expenditure) incurred by the applicant(s).

Where this is the case, the applicant(s) will not be entitled to claim the accelerated wear and tear allowances available under section 285D TCA 1997 in relation to that expenditure. However, any applicant whose application was initially rejected for this reason may submit a new application the following year. Where the Minister issues a qualifying certificate in these circumstances, the applicant may claim the accelerated wear and tear allowances commencing in the year in which the provisions of section 284(1) TCA 1997 were met.

If additional funds subsequently become available for a particular year following an unsuccessful appeal(s) against a decision by the Minister not to issue a qualifying certificate(s) in another case(s), an application which was turned down for budgetary reasons in that year will be reviewed. Following such a review, qualifying certificates may be issued, for that year, to applicants who were initially unsuccessful. It may happen that an initially unsuccessful applicant may have made another application in respect of the same qualifying equipment in the following year which is successful. In such circumstances, if a claim has already been made for accelerated capital allowances on foot of a certificate issued for a year subsequent to the year in which the initial unsuccessful application was made, it will be necessary to amend the relevant return(s) to include the details of the certificate issued for the year of the

initial unsuccessful application. This is necessary as DAFM will cancel the first issued certificate.

Additionally, if, following an unsuccessful application for a certificate, a person has made a claim for wear and tear allowances at the standard rate of 12.5% over 8 years but subsequently receives a qualifying certificate in relation to the qualifying equipment, it will be necessary to amend the relevant return(s) to disallow the standard rate allowances and claim the accelerated allowances.

#### Scenario 1:

John, a farmer, purchases a piece of qualifying equipment costing €200,000 (ex. Vat) in 2022 and puts it into use immediately. He applies to DAFM for a qualifying certificate, but it is not issued due to budgetary constraints in 2022. John re-applies for a certificate in early 2023 in respect of the same piece of qualifying equipment. He decides to file his 2022 Income Tax Return (Form 11) shortly afterwards. In these circumstances, John cannot claim the accelerated capital allowances in his 2022 return as he does not hold a qualifying certificate at that time. He can however claim wear and tear allowances at the normal rate of 12.5%.

A qualifying certificate issues later in 2023 in respect of the qualifying equipment purchased and put into use in 2022. John is now entitled to claim the accelerated allowances for 2022. He should amend his 2022 Income Tax Return to claim 50%<sup>5</sup> of the qualifying expenditure and to provide other details, including the unique identification number, shown on the qualifying certificate. He should also amend the return to remove the wear and tear allowance claimed at 12.5%. He can claim the remaining 50% in his tax return for 2023.

#### Scenario 2:

John, a farmer, purchases a piece of equipment costing €200,000 (exc. VAT) in 2022 and puts it into use immediately. He applies to DAFM for a qualifying certificate, but it is not issued due to budgetary constraints in 2022. John re-applies for a qualifying certificate in early 2023 in respect of the same piece of qualifying equipment and receives the certificate shortly thereafter. John files his 2022 Income Tax Return and claims 50% of the qualifying expenditure and provides other details, including the unique identification number, shown on the certificate.

Subsequently, additional funds become available for the 2022 budget for the scheme due to a number of unsuccessful appeals. DAFM review John's initial application. A qualifying certificate is issued in respect of John's first application in 2022. John now has two qualifying certificates relating to the same piece of qualifying equipment. The qualifying certificate issued on foot of John's first application in 2022 supersedes the certificate issued on foot of his application in relation to the same piece of qualifying equipment in 2023.

<sup>5</sup> This is the maximum of the qualifying expenditure that can be claimed in any one year i.e., John cannot claim the original 12.5% under section 284 plus the 50% provided for under section 285D.

7

In these circumstances, John must amend his Income Tax Return for 2022 to provide the details, including the unique identification number, shown on the qualifying certificate issued on foot of his initial application in 2022. This adjustment is necessary as DAFM will cancel the certificate issued in respect of the 2023 application.

## 11. Appeals process

The Minister may decide not to issue a qualifying certificate (for reasons other than the annual budget being exceeded) in certain cases. For example, the Minister could form the opinion that the equipment is not qualifying equipment. Alternatively, a certificate may be issued specifying an amount of qualifying expenditure which is less than the purchase price of the equipment. In any such case, the Minister will notify the applicant. The notification will state the reason for the decision and inform the applicant of their right to appeal the decision, the procedures for lodging an appeal and details of any related fees. If an appeal is not received within 21 days of the date of the notification, the decision not to issue a qualifying certificate, or to issue one for less than the purchase price of the equipment, becomes final.

## 12. Limit on relief and disclosure of information

There is a limit of €500,000 on the total amount of relief that can be granted to any person under this scheme. Additionally, where the total amount of relief granted to a person in a chargeable period, and for any previous chargeable periods, exceeds €10,000, Revenue may disclose (for the purposes of complying with EU State aid rules) the following information:

- the name of the person,
- the sector of activity at NACE group level,<sup>6</sup>
- the territorial unit, within the meaning of the NUTS Level 2 classification specified in Annex 1 to Regulation (EC) No 1059/2003 (as amended), in which the person is located,<sup>7</sup> and
- the year in which the relief is granted.

<sup>&</sup>lt;sup>6</sup> https://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:32006R1893&from=en

https://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:32019R1755&from=EN

For the purposes of calculating the amount of relief granted to a person in a chargeable period the following formula is used:

$$R = A - B$$

Where -

"R" = the amount of the relief granted to the person in the chargeable period,

"A" = the amount of relevant  $tax^8$  that would be payable by the eligible person<sup>9</sup> for the chargeable period, but for subsection (14)<sup>10</sup>, and

"B" = the amount of relevant tax payable by the eligible person for that chargeable period.

DAFM is obliged to share details of the certificates issued each year with Revenue, including, in relation to each certificate, the information specified on the certificate. This information may be used by Revenue to review claims.

The data shared will contain personal data including the name, address and TRN of the farmer, along with the certificate number and the details of the equipment purchased and the qualifying expenditure. This is to ensure that each individual farmer partaking in the scheme has a unique identification number. In the case of an individual, their TRN will be that person's Personal Public Service Number (PPSN). The use of the PPSN will allow the individual claim to be matched accurately, processed, and will ensure that the relevant capital allowances are being claimed.

<sup>10</sup> The subsection that provides for the accelerated allowances.

<sup>&</sup>lt;sup>8</sup> Corporation tax or income tax, USC and PRSI, as appropriate.

<sup>&</sup>lt;sup>9</sup> A person carrying on a trade of farming.

# Appendix 1 - Schedule 35 TCA 1997

Equipment type	Description
(1)	(2)
Hydraulic linkage arms	An agricultural tractor jacking system that uses either
mounted tractor jacking	the rear or front mounted lower linkage arms to
systems.	enable an agricultural tractor to be lifted so that one
O	or more wheels may be replaced on the agricultural
	tractor. The jacking system shall bear CE marking in
	accordance with Article 16 of the machinery Directive <sup>11</sup>
3	and be in conformity with the requirements of that
6	Directive.
Big bag (equal to or greater	Lifting system for bags of fertiliser or seed of 500kg
than 500kg) lifter, with or	mass or greater. The system shall be mounted on
without integral bag cutting	either the three-point linkage of an agricultural
system.	tractor, front loader of an agricultural tractor or
10	mounted on a fertiliser or seed drill. The lifter shall be
.7,	capable of securely holding the bag and raising the
	bag over a fertilizer spreader or seed drill. The system
	may have an integral system for automatically
	opening the bag. The lifting system shall bear CE
	marking in accordance with Article 16 of the
	machinery Directive and be in conformity with the
	requirements of that Directive.
	0,

<sup>&</sup>lt;sup>11</sup> "machinery Directive" means Directive 2006/42/EC of the European Parliament and of the Council of 17 May 2006 on machinery, and amending Directive 95/16/EC (recast).

Chemical Storage cabinets.	A storage cabinet fitted with a locking device and
	integral bund for the storage of pesticides and other
	chemicals. The cabinet may be made of metal or hard
	plastic, or a combination of both. The cabinet shall be
	suitably vented to prevent a build-up of fumes.
Animal anti-backing gate for	Device to be mounted on the side of a cattle crush or
use in cattle crush or race.	cattle crush race to prevent an animal from reversing
	along the cattle crush or cattle crush race. The device
	shall allow an animal to pass up along the cattle crush
A	or cattle crush race and shall be either automatically
	or manually moved into position once an animal has
	passed.
Quick hitch mechanism for	A one-part or two-part system to enable the hitching
rear and front three-point	of implements to an agricultural tractor three-point
linkage to enable hitching	linkage without having to descend from the
of implements without	agricultural tractor. The system shall be connected to
need to descend from	the three-point hydraulic linkage of the agricultural
tractor.	tractor and enable the agricultural tractor to link to an
20	implement. The system shall bear CE marking in
	accordance with Article 16 of the machinery Directive
	and be in conformity with the requirements of that
	Directive.
